Stamp Quick Start Guide

---

1. Installation

- Requires **Windows 10+** with **Python 3.11+**
- Extract the `stampd_production_ready` folder
- Run **`launch_stampd.bat`**
 - Creates venv
 - Installs dependencies
 - Starts app at **http://127.0.0.1:7860**

Dependencies
- gradio
- sqlalchemy
- pandas
- openpyxl
- pillow
- requests

Optional for AI:
- Ollama (local model runner)
- LM Studio (local LLM API fallback)

---

2. First Launch

- 2 sample stamps are **preloaded**
- Navigate to **Gallery & Inline Edit** tab
- Use **Auto AI Fill** ~~LM Studio** fallback chain~~

~~---~~

~~## 7. Backups and Exports~~

~~- Auto hourly backup CSV & XLSX~~
~~- Thumbnails included in XLSX~~

~~---~~

~~## 8. Silent Mode~~

~~- Run **`launch_stampd_silent.bat`**~~
~~- UI still accessible via browser~~
~~- Hourly auto-backups continue~~

---

9. Tips

- Keep original images in **`images/`**
- `temp_uploads/` only for listing preview
- Use **Auto AI Fill** for clean exports
- Use filters for **sold/unsold lots**
